*Introduction* 1

**Entries A to Z**
abc conjecture 6
abundant number 7
AKS algorithm for primality testing 8
aliquot sequences (sociable chains) 9
almost-primes 11
amicable numbers 11
  amicable curiosities 12
Andrica's conjecture 13
arithmetic progressions, of primes 13
Aurifeuillian factorization 14
average prime 15
Bang's theorem 16
Bateman's conjecture 16
Beal's conjecture, and prize 16
Benford's law 17
Bernoulli numbers 19
  Bernoulli number curiosities 20
Bertrand's postulate 20
Bonse's inequality 21
Brier numbers 21
Brocard's conjecture 22
Brun's constant 22
Buss's function 23
Carmichael numbers 23
Catalan's conjecture 24
Catalan's Mersenne conjecture 25
Champernowne's constant 26

champion numbers 26
Chinese remainder theorem 26
cicadas and prime periods 27
circle, prime 27
circular prime 28
Clay prizes, the 28
compositorial 29
concatenation of primes 29
conjectures 30
consecutive integer sequence 32
consecutive numbers 32
consecutive primes, sums of 32
Conway's prime-producing machine 33
cousin primes 33
Cullen primes 34
Cunningham project 34
Cunningham chains 35
decimals, recurring (periodic) 36
  the period of 1/13 36
  cyclic numbers 37
  Artin's conjecture 38
  the repunit connection 38
  magic squares 39
deficient number 40
deletable and truncatable primes 40
Demlo numbers 40
descriptive primes 41
Dickson's conjecture 41
digit properties 42
Diophantus (c. AD 200; d. 284) 42
Dirichlet's theorem and primes in arithmetic series 44
  primes in polynomials 45
distributed computing 45
divisibility tests 48
divisors (factors) 48
  how many divisors? how big is $d(n)$? 49
  record number of divisors 50
  curiosities of $d(n)$ 50
  divisors and congruences 51
  the sum of divisors function 51
  the size of $\sigma(n)$ 52

Printed with FinePrint trial version - purchase at www.fineprint.com

a recursive formula 52
divisors and partitions 53
curiosities of $\sigma(n)$ 53
prime factors 54
divisor curiosities 54
economical numbers 55
Electronic Frontier Foundation 55
elliptic curve primality proving 56
emirp 57
Eratosthenes of Cyrene, the sieve of 58
Erdös, Paul (1913–1996) 59
his collaborators and Erdös numbers 61
errors 63
Euclid (c. 330–270 BC) 64
unique factorization 65
$\sqrt{2}$ is irrational 65
Euclid and the infinity of primes 66
consecutive composite numbers 67
primes of the form $4n + 3$ 67
a recursive sequence 67
Euclid and the first perfect number 68
Euclidean algorithm 68
Euler, Leonhard (1707–1783) 69
Euler's convenient numbers 70
the Basel problem 72
Euler's constant 73
Euler and the reciprocals of the primes 73
Euler's totient (phi) function 74
Carmichael's totient function conjecture 75
curiosities of $\phi(n)$ 77
Euler's quadratic 77
the Lucky Numbers of Euler 78
factorial 80
factors of factorials 80
factorial primes 80
factorial sums 81
factorials, double, triple . . . 82
factorization, methods of 82
factors of particular forms 84
Fermat's algorithm 85
Legendre's method 86

congruences and factorization 87
how difficult is it to factor large numbers? 87
quantum computation 88
Feit-Thompson conjecture 89
Fermat, Pierre de (1607–1665) 89
Fermat's Little Theorem 91
Fermat quotient 92
Fermat and primes of the form $x^2 + y^2$ 92
Fermat's conjecture, Fermat numbers, and Fermat primes 94
Fermat factorization, from $F_5$ to $F_{30}$ 95
Generalized Fermat numbers 97
Fermat's Last Theorem 97
the first case of Fermat's Last Theorem 99
Wall-Sun-Sun primes 99
Fermat-Catalan equation and conjecture 100
Fibonacci numbers 101
divisibility properties 102
Fibonacci curiosities 103
Édouard Lucas and the Fibonacci numbers 104
Fibonacci composite sequences 105
formulae for primes 106
Fortunate numbers and Fortune's conjecture 108
gaps between primes and composite runs 109
Gauss, Johann Carl Friedrich (1777–1855) 110
Gauss and the distribution of primes 111
Gaussian primes 112
Gauss's circle problem 113
Gilbreath's conjecture 113
GIMPS—Great Internet Mersenne Prime Search 115
Giuga's conjecture 116
Giuga numbers 116
Goldbach's conjecture 117
good primes 119
Grimm's problem 119
Hardy, G. H. (1877–1947) 119
Hardy-Littlewood conjectures 121
heuristic reasoning 123
a heuristic argument by George Pólya 123
Hilbert's 23 problems 124
home prime 125
hypothesis H 126

Printed with FinePrint trial version - purchase at www.fineprint.com

illegal prime 126
inconsummate number 128
induction 128
jumping champion 131
*k*-tuples conjecture, prime 131
knots, prime and composite 132
Landau, Edmund (1877–1938) 134
left-truncatable prime 134
Legendre, A. M. (1752–1833) 134
Lehmer, Derrick Norman (1867–1938) 135
Lehmer, Derrick Henry (1905–1991) 135
Linnik's constant 137
Liouville, Joseph (1809–1882) 137
Littlewood's theorem 138
  the prime numbers race 138
Lucas, Édouard (1842–1891) 139
  the Lucas sequence 142
  primality testing 144
  Lucas's game of calculation 145
  the Lucas-Lehmer test 146
lucky numbers 147
  the number of lucky numbers and primes 148
  "random" primes 148
magic squares 149
Matijasevic and Hilbert's 10th problem 150
Mersenne numbers and Mersenne primes 151
  Mersenne numbers 152
  hunting for Mersenne primes 152
  the coming of electronic computers 153
  Mersenne prime conjectures 155
  the New Mersenne conjecture 156
  how many Mersenne primes? 156
  Eberhart's conjecture 157
  factors of Mersenne numbers 157
  Lucas-Lehmer test for Mersenne primes 158
Mertens constant 159
Mertens theorem 159
Mills' theorem 160
  Wright's theorem 161
mixed bag 161
multiplication, fast 162

Niven numbers 163
odd numbers as $p + 2a^2$ 164
Opperman's conjecture 164
palindromic primes 164
pandigital primes 165
Pascal's triangle and the binomial coefficients 165
  Pascal's triangle and Sierpinski's gasket 167
  Pascal triangle curiosities 167
patents on prime numbers 168
Pépin's test for Fermat numbers 169
perfect numbers 170
  odd perfect numbers 172
perfect, multiply 172
permutable primes 174
$\pi$, primes in the decimal expansion of 174
Pocklington's theorem 175
Polignac's conjectures 175
  Polignac or obstinate numbers 175
powerful numbers 176
primality testing 177
  probabilistic methods 179
prime number graph 180
prime number theorem and the prime counting function 181
  history 181
  elementary proof 182
  record calculations 183
  estimating $p(n)$ 185
  calculating $p(n)$ 185
  a curiosity 185
prime pretender 186
primitive prime factor 187
primitive roots 187
  Artin's conjecture 188
  a curiosity 188
primorial 188
  primorial primes 189
Proth's theorem 189
pseudoperfect numbers 190
pseudoprimes 190
  bases and pseudoprimes 192

Printed with FinePrint trial version - purchase at www.fineprint.com

pseudoprimes, strong 192
public key encryption 193
pyramid, prime 194
Pythagorean triangles, prime 195
quadratic residues 195
  residual curiosities 196
  polynomial congruences 196
quadratic reciprocity, law of 197
  Euler's criterion 198
Ramanujan, Srinivasa (1887–1920) 198
  highly composite numbers 199
randomness, of primes 200
  Von Sternach and a prime random walk 202
record primes 203
  some records 203
repunits, prime 204
Rhonda numbers 206
Riemann hypothesis 206
  the Farey sequence and the Riemann hypothesis 209
  the Riemann hypothesis and $\sigma(n)$, the sum of divisors function 210
  squarefree and blue and red numbers 210
  the Mertens conjecture 211
  Riemann hypothesis curiosities 211
Riesel number 212
right-truncatable prime 212
RSA algorithm 212
  Martin Gardner's challenge 214
RSA Factoring Challenge, the New 215
Ruth-Aaron numbers 216
Scherk's conjecture 217
semi-primes 217
sexy primes 218
Shank's conjecture 218
Siamese primes 219
Sierpinski numbers 219
  Sierpinski strings 219
  Sierpinski's quadratic 219
  Sierpinski's $\phi(n)$ conjecture 219
Sloane's *On-Line Encyclopedia of Integer Sequences* 220

Smith numbers 221
  Smith brothers 222
smooth numbers 222
Sophie Germain primes 223
  safe primes 224
squarefree numbers 224
Stern prime 225
strong law of small numbers 225
triangular numbers 228
trivia 228
twin primes 229
  twin curiosities 230
Ulam spiral 232
unitary divisors 233
  unitary perfect 234
untouchable numbers 235
weird numbers 235
Wieferich primes 235
Wilson's theorem 236
  twin primes 237
  Wilson primes 237
Wolstenholme's numbers, and theorems 238
  more factors of Wolstenholme numbers 239
Woodall primes 240
zeta mysteries: the quantum connection 241
